Diniz Design Inc. GRANITE • SLATE • STONE

Demolition Acknowledgment and Waiver

Demolition must be done prior to taking final measurements. After final measurements are taken, we will schedule your job according to current availability. The time frame between demolition and installation allows Diniz Design the time to fabricate the material and the homeowner time for any adjustments that need to be made to the cabinets in preparation for our installation. All appliances and sinks must be disconnected prior to demolition. We are not certified to do any plumbing, carpentry, or electrical work. We will take care not to cause any damage to your cabinets, appliances, and walls/trim, but because of the nature of demolition this may be unavoidable. Diniz Design cannot be held responsible for such damage. We would prefer that you move your own appliances, if Diniz Design has to move appliances during demolition, we will not be responsible for any damage to them. If cabinets are not level after demolition, it is the customer's responsibility to have them leveled before installation can take place. It may seem to be an inconvenience, but we cannot install on unlevelled cabinets because the integrity and longevity of the stone will be compromised. Wall Board may need to be replaced when tile or Formica is removed from the backsplash. Diniz Design will provide this for an extra charge. Trim may be needed below the countertop once the wood edge-band surrounding the Formica or tile countertop is removed. It is the customer's responsibility to obtain that trim. If there is an appliance garage on the counter, some unavoidable damage may be caused when removing the countertop beneath it. It is the customer's responsibility to obtain wood or stone trim to conceal this damage.
